Hello Bob,

Please take a look at this example of what we had in mind. I tried to match the number of rows/sizing closely to what you provided on slide 6 of your presentation. Let me know what you think or if you have questions.

Subject: GM/EPA Correspondence Regarding Request to eliminate fuel rate on HDDE labels

Jay,

Based on your statement in your email earlier this week (shown below).

-For diesel engines, §86.007-35(a)(3)(iii)(G) requires the advertised power (at RPM), fuel rate at this power level, valve lash, initial injection timing, and idle speed be on the label. I think we are ok with leaving off valve lash, injection timing and idle, but we would like to see fuel rate and advertised power on the label.

The email string below allowed GM to delete the statement that included fuel rate in 2010. With this allowance we have not been listing

any of these items on the GM label.

Best Regards,

Bob Mathis

Andrew,

We have discussed Gm's submittal request to eliminate "fuel rate" information on heavy duty diesel labels. GM can omit fuel rate.

Jason,

I'm just following-up on the request below. Is there a potential time frame when we can expect feedback?

Thanks,

Andy Barren
